Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 36-42, drawn to methods of cleansing a filter, classified in class 210, subclass 791.
- II. Claims 9-35, drawn to filter backwashing units, classified in class 210, subclass 411.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatuses recited in claims 9-17, 31, and 32 could be used to practice other and materially different processes, for example, processes to back flush a conduit system that excludes a filter. In addition, the processes could be carried out by other and materially different apparatuses, for example, ones using manual control as opposed to those having microcontrollers as included in claims 18-30.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

In addition, this application discloses four patently distinct species of inventions which correspond to the drawings as follows:

Species 1 corresponds to FIG. 1;

Species 2 corresponds to FIG. 2;

Species 3 corresponds to FIG. 4;

Species 4 corresponds to FIGS. 5-6.

This application also discloses seven patently distinct subspecies of purified water including water purified by reverse osmosis (w1), steam distillation (w2), deionization (w3), water having at least 50% (w4) or 80% (w5) or 95% (w6) less dissolved solids than the water being filtered.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Claims 3 and 38 correspond to species w1-w3;

Claims 5, 15, 24, 33, and 40 correspond to species w4;

Claims 6, 16, 25, 34, and 41 correspond to species w5;

Claims 7, 17, 26, 35, and 42 correspond to species w6;

Claim 8 corresponds to species 2-4;

Claims 9 and 10 correspond to species 1, 3, and 4;

Claims 11-18, 23-26, and 31-42 correspond to species 3 and 4;

Claims 19-22, and 27-30 correspond to species 4.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species and subspecies for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1 and 2 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1724

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
